VBCPS Plan for Continuous Improvement

Review and Analysis of Results

School: Floyd E. Kellam High School

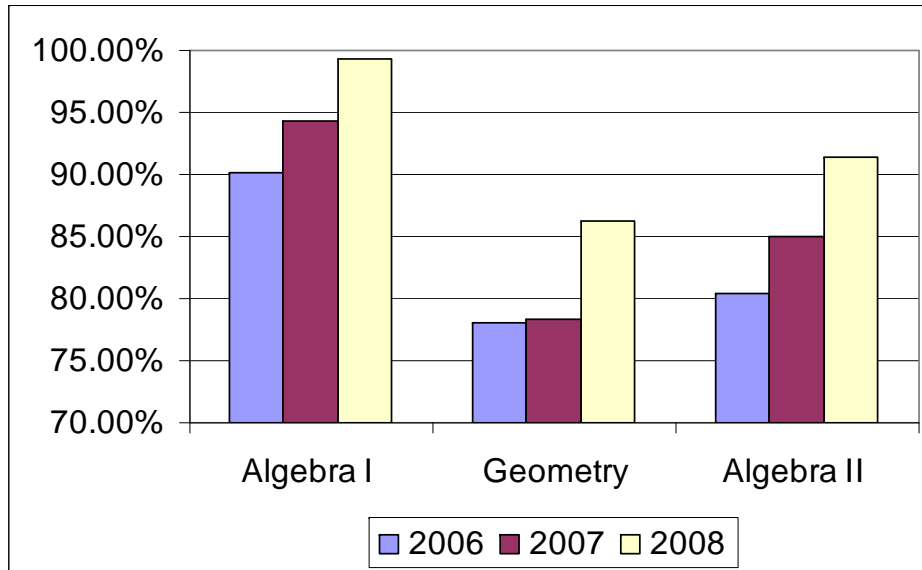

DATE: 10/31/08

Review

(Objective data, qualitative indicators, trends and comparisons)

Analysis

(Identify gaps and list priorities)

Kellam's Algebra 1 SOL pass rates ranked second in the division at 99.35 percent passing, and the Algebra 2 pass rates increased by six percentage points.

Priority: Although Geometry pass rates are higher than the division average, the largest subgroup gaps can be found with this test. The priority is to explore ways to close the achievement gaps in the following subgroups: African Americans and Students with Disabilities.
